Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on _____.
- 2a) This action is **FINAL**. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 5) Notice of Informal Patent Application (PTO-152)
- 6) Other: _____.

Claims 3-4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. .

It's unclear how the system operates. The thermal reactive strip 31 is mounted in parallel with the guide rod means 32, and the bearing 33 is pressing perpendicularly to the strip. So, it's unclear how the bearing and rod means can be moved when the shape of the strip 31 is changed. It seems like the shape change of the strip 31 would create a force perpendicular to the guide rod means. So, it's impossible for said bearing to move in the direction parallel to the strip.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 is dependent from claim 2 which has been canceled.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3-4 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4598550 (Abbott).

Abbott discloses a heat engine comprising thermal reactive strips 7a, 7b, mounted in the horizontal direction, bearing 9, a shade 13 for controlling the sun light. The solar energy causes the strips 7 to change shape and therefore moves the bearing 9 to produce output energy.

Claims 3-4 are rejected under 35 U.S.C. 102(b) as being anticipated by US 406594 (Horton).

Horton discloses a heat engine comprising thermal reactive strips 25 mounted in the horizontal direction, bearing having plates 22. The solar energy causes the strips 25 to change shape and therefore moves the bearing to produce output energy.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Letovsky, Ray, Neidigh, and Jackson disclose solar energy system comprising thermal reactive strips.

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Examiner Nguyen whose telephone number is (703) 308-3477. The examiner can normally be reached on Monday--Thursday from 7:30 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Denion, can be reached on (703)-308-2623. The fax phone number for the Examiner is (703) 872-9302 for regular communication, and (703) 872-9303 for after final communication.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0861.

A handwritten signature in black ink, appearing to read "HOANG NGUYEN" with a stylized "H" and "N". To the right of the main name, there is a smaller, less distinct signature that appears to read "4/30/04".
